Discussion

The committee reviewed the Q2 financial statements in detail. Members noted a 6% increase in operating costs compared to the previous quarter, primarily attributed to increased fuel and maintenance expenses. The finance manager was asked to prepare a cost-control plan for review at the next meeting.

The proposed annual budget was discussed at length. The committee agreed in principle to the overall budget envelope, subject to minor revisions in the procurement allocation line item, to be finalized before the next BOD meeting.
